

Hydrology Club at UCSB

Who are we?

Founded in 2023, we want to bring together students interested in water-related careers, community projects, networking, and hands-on opportunities to support the next generation of water professionals.

Recruiting students at Club Rush

Hydrology Club was first group of undergraduates to attend a GRA Central Coast Branch Meeting

Attending 2025 Ray Taber Drill Day in Fresno

What do we do?

- Provide professional and networking opportunities
- Participate in Drill Days, UC Water Academy, GRA events
- Build community through field activities, water-related academic paper discussions, study sessions, grant-writing workshops, and bringing in guest lecturers

Learning about Lake Piru during tour of the United Water Conservation District's facilities

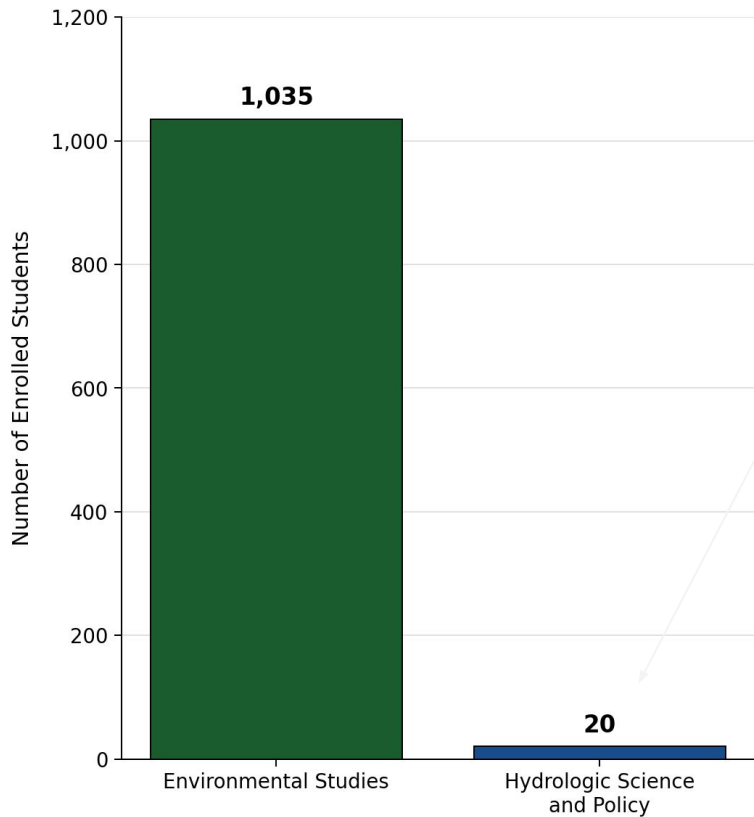

Hydrology Club at 2026 Ray Taber Drill Day in Yolo County

Lunch with Darcy Lecturer Dr. Grant Ferguson

How can you help?

**UCSB Environmental Studies Program
Major Distribution (2025-2026)**

Help bridge the gap between industry and academia in the water sector by

- Speaking at club events to expose more Environmental Science undergraduates to hydrology
- Collaborating with Hydrology Club to organize tours to show undergrads what a day in the life of the private sector looks like
- Supporting the Hydrology Club long-term to help provide transportation, event fees and gain hands-on experience needed for careers in water resources

(and hire us!!)
